

I am running a 5 class course under the new modules scheme. I have a class of 5 but would really like to have a larger number which would make the course cheaper for everyone.

MODULE 103 – GEOMETRIC DESIGN

7 geometric shapes to complete as practical work in each class.

Vertical

Circular – all round

Symmetrical Triangle

Asymmetrical Triangle and Hogarth Curve

Crescent and inverted crescent

The only written work to complete will be the evaluation forms for each design completed, with a photograph of your design to accompany each evaluation form.

The course will be taught in the Bookham Area on a day of the week to suit everyone as much as we can.

You will receive a NAFAS Certificate on satisfactory completion of the course

If anyone is interested in joining the class please contact
